

Name : SMIT MISTRY

Enroll no. : 2402030430028

Step 1 : create github account

Already have an account? [Sign in](#)

Sign up to GitHub

Email*

Password*

Password should be at least 15 characters OR at least 8 characters including a number and a lowercase letter.

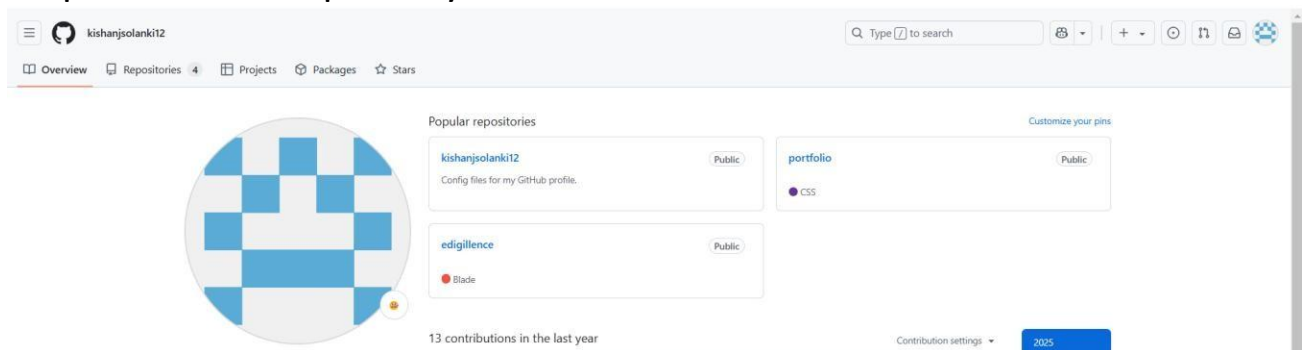

Username*

Username may only contain alphanumeric characters or single hyphens, and cannot begin or end with a hyphen.

[Continue](#)

By creating an account, you agree to the [Terms of Service](#). For more information about GitHub's privacy practices, see the [GitHub Privacy Statement](#). We'll occasionally send you account-related emails.

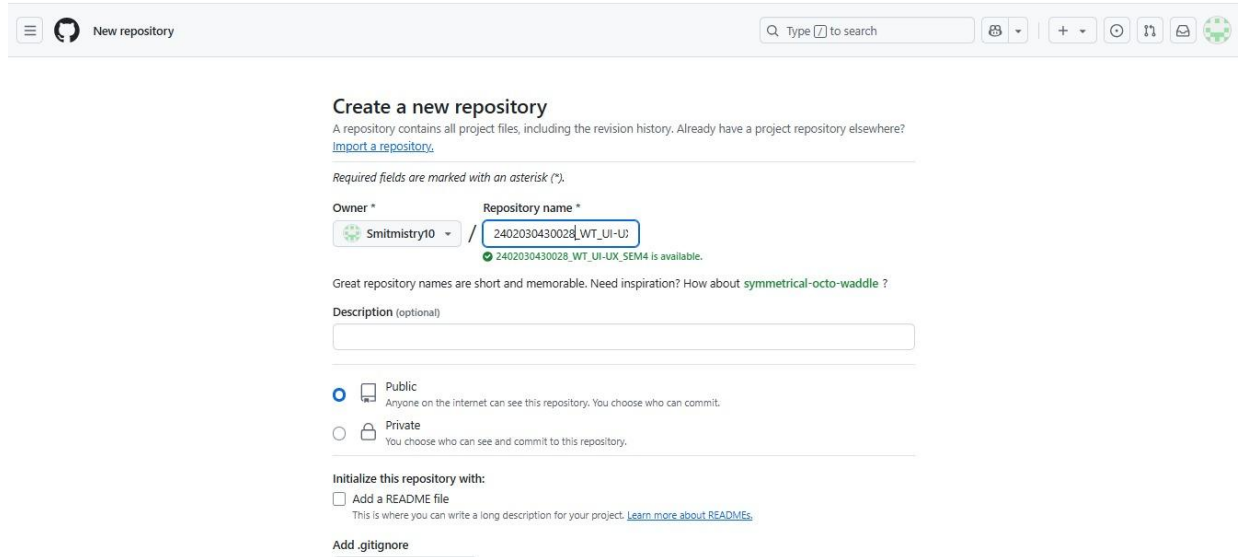

Step 2 : Click on repository

Step 3 : click on new repository

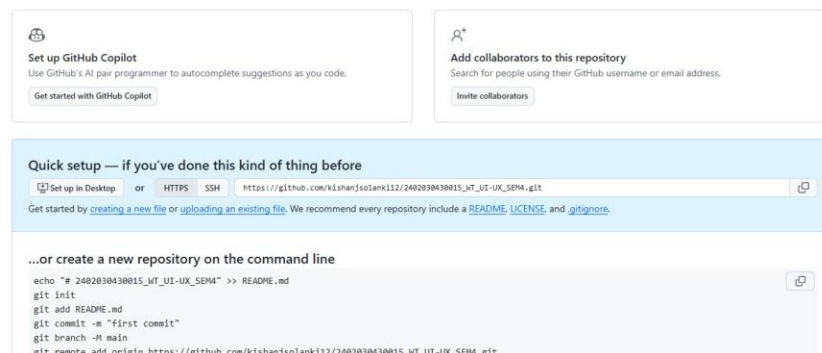

step 4 : create the new repository on github

The screenshot shows the GitHub 'Create a new repository' page. At the top, there's a search bar and navigation icons. The main heading is 'Create a new repository', followed by a subtext: 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'. Below this, a note states: 'Required fields are marked with an asterisk (*)'. The 'Owner' dropdown is set to 'Smitmisty10'. The 'Repository name' field contains '2402030430028_WT_UI-UX', with a green checkmark indicating '2402030430028_WT_UI-UX_SEM4 is available.'. A hint below the name field says: 'Great repository names are short and memorable. Need inspiration? How about [symmetrical-octo-waddle](#) ?'. The 'Description (optional)' field is empty. Under 'Visibility', the 'Public' radio button is selected, with the text 'Anyone on the internet can see this repository. You choose who can commit.'. The 'Private' option is also visible. The 'Initialize this repository with:' section has an unchecked checkbox for 'Add a README file' and a link to 'Learn more about READMEs.'. The 'Add .gitignore' link is at the bottom.

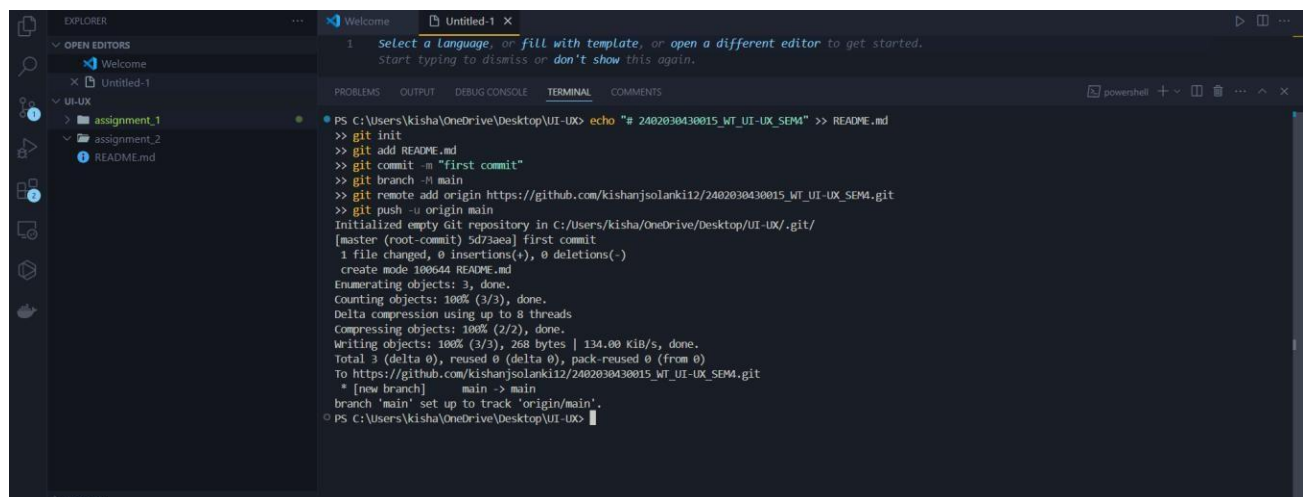

step 5 : copy the code and paste in to terminal or shell

The screenshot shows the GitHub repository page for '2402030430028_WT_UI-UX_SEM4'. It features two main sections: 'Set up GitHub Copilot' and 'Add collaborators to this repository'. Below these is a 'Quick setup' section with instructions for setting up the repository on a desktop or via HTTPS/SSH. The SSH URL is 'https://github.com/kishanjsolanki12/2402030430028_WT_UI-UX_SEM4.git'. A section titled '...or create a new repository on the command line' provides a series of terminal commands:

```
echo "# 2402030430028_WT_UI-UX_SEM4" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/kishanjsolanki12/2402030430028_WT_UI-UX_SEM4.git
```

step 6 : paste the code in to vs code terminal

The screenshot shows a VS Code terminal window with the following commands and output:

```
PS C:\Users\kisha\OneDrive\Desktop\UI-UX> echo "# 2402030430028_WT_UI-UX_SEM4" >> README.md
>> git init
>> git add README.md
>> git commit -m "first commit"
>> git branch -M main
>> git remote add origin https://github.com/kishanjsolanki12/2402030430028_WT_UI-UX_SEM4.git
>> git push -u origin main

**Set up GitHub Copilot**
Use GitHub's AI pair programmer to autocomplete suggestions as you code.
[Get started with GitHub Copilot](#)

**Add collaborators to this repository**
Search for people using their GitHub username or email address.
[Invite collaborators](#)

Quick setup — if you've done this kind of thing before

Set up in Desktop or **HTTPS** SSH `https://github.com/kishanjsolanki112/2402030430015_WT_UI-UX_SEM4.git`

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [gitignore](#).

...or create a new repository on the command line

```
echo "# 2402030430015_WT_UI-UX_SEM4" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/kishanjsolanki112/2402030430015_WT_UI-UX_SEM4.git
```
